Data Quality and Completeness

Complete and accurate records are required to ensure data quality. Required Data that is missing, incomplete or not collected has a negative impact on the quality of data. The higher the percentage of missing or erroneous data, the less useful the data becomes.

Error rate includes data not collected, missing information, client does not know, and client refused options. A program should have less than a 5% error rate to ensure accurate data. Missing intake and exit data need to be reviewed by staff on a regular basis. Any additional Data received from the client after enrollment should be entered into the Homeless Management Information System (HMIS) within a timely manner.

HUD Policy: A 95% standard of completeness rate for all funded homeless projects should be established and expected. Programs should work toward ensuring that 95% of all required data elements for each client served are collected and entered correctly into the HMIS.

PROGRAM INFORMATION

Agency Name: **Illumination Foundation**

Type	0 days	1-3 days	4-6 days	7-10 days	11+ days	Average
Entry Timeliness	53	22	13	18	120	38
Exit Timeliness	23	25	14	17	129	30

This report calculates the difference between the program entry date specified for the client and the date the client's application was entered into the system. For example, if a client's Program Entry date of "April 4, 2016" was recorded on "April 9, 2016," then the report would calculate a 5-day lag time in recording data. The report groups the number of applications by program and has 5 buckets for the number of days an application has been lagging.

HUD Policy: Data entry should be current within 2 business days of intake, exit, and service provision.
