## PROGRAM INFORMATION

Agency Name: **Operation Grace**

## Data Quality and Completeness

Complete and accurate records are required to ensure data quality. Required Data that is missing, incomplete or not collected has a negative impact on the quality of data. The higher the percentage of missing or erroneous data, the less useful the data becomes.

**Total Clients Served:** 711

Error rate includes data not collected, missing information, client does not know, and client refused options. A program should have less than a 5% error rate to ensure accurate data. Missing intake and exit data need to be reviewed by staff on a regular basis. Any additional Data received from the client after enrollment should be entered into the Homeless Management Information System (HMIS) within a timely manner.

**HUD Policy:** A 95% standard of completeness rate for all funded homeless projects should be established and expected. Programs should work toward ensuring that 95% of all required data elements for each client served are collected and entered correctly into the HMIS.

Sample Reporting Period 10/1/2024 to 12/31/2025

## PROGRAM INFORMATION

Agency Name: **Operation Grace**

Type	0 days	1-3 days	4-6 days	7-10 days	11+ days	Average
Entry Timeliness	381	22	9	11	141	19
Exit Timeliness	60	16	8	9	162	79

This report calculates the difference between the program entry date specified for the client and the date the client's application was entered into the system. For example, if a client's Program Entry date of "April 4, 2016" was recorded on "April 9, 2016," then the report would calculate a 5-day lag time in recording data. The report groups the number of applications by program and has 5 buckets for the number of days an application has been lagging.

**HUD Policy:** Data entry should be current within 2 business days of intake, exit, and service provision.
