*Unsheltered Count Survey* ..... 84

## EXECUTIVE SUMMARY

There were 4,255 adults and children who were counted as homeless during the 2024 Point-In-Time Count and Survey. The previous Point-In-Time homeless count and survey was completed in 2023 during which 4,195 persons were counted. A comparison of the last two counts reveals that :

- 42 more persons were counted in 2024, which represents an increase of 1.4%;
- 79 more persons were counted as unsheltered in 2024 when compared to the unsheltered count in 2023, which represents an increase of 2.6%; and
- 19 less persons were counted as sheltered in 2024 when compared to the sheltered count in 2023, which represents a decrease of 1.6%.

**Table 1.** Comparison of 2023 and 2024 Homeless Counts

	Sheltered	Unsheltered	Total
2023 Homeless Count	1,219	2,976	4,195
2024 Homeless Count	1,200	3,055	4,255
Difference:	-19 (1.6%)	+79 (2.6%)	+60 (1.4%)

Regarding sheltered homelessness, the U.S. Department of Housing and Urban Development states that:

- Continuums of Care must count all individuals or families who meet the criteria in paragraph (1)(ii) of the homeless definition in 24 CFR 578.3. This includes individuals and families “living in a supervised publicly or privately operated shelter designated to provide temporary living arrangements (including congregate shelters, transitional housing, and hotels and motels paid for by charitable organizations or by federal, state, or local government programs for low-income individuals)” on the night designated for the count. This includes individuals residing in Safe Haven projects.

Regarding unsheltered homelessness, the U.S. Department of Housing and Urban Development states that:

- Continuums of Care must count all individuals or families who meet the criteria in paragraph (1)(i) of the homeless definition in 24 CFR 578.3. This includes individuals and families “with a primary nighttime residence that is a public or private place not designed for or ordinarily used as a regular sleeping accommodation for human beings, including a car, park, abandoned building, bus or train station, airport, or camping ground” on the night designated for the count. Rapid Re-Housing (RRH) assisted households who are still unsheltered on the night of the count (e.g., staying in an encampment and being assisted by an RRH project to obtain housing) must be included as part of the unsheltered count.

The following chart shows that the number of persons counted as unsheltered and sheltered in 2018 was 2,118 and 4,255 in 2024, which represents an increase of 2,137 persons or 100%

**Chart 1.** Persons Counted 2018-2024

The following table provides a breakdown of the total number of sheltered and unsheltered persons counted in 2024 by jurisdiction.

Table 3 notes that approximately three-fourths (75.5%) or 3,200 of the 4,237 homeless adults and children were counted within the seven cities of Barstow, Colton, Fontana, Ontario, Redlands, San Bernardino, and Victorville. These seven cities accounted for 2,187 or nearly three-fourths (71.6%) of the total unsheltered population of 3,055, and 762 or 90.0% of the 844 persons counted in shelters, and 251 or 74.2% of those in transitional housing.

## BACKGROUND INFORMATION

The U.S. Department of Housing and Urban Development (HUD), as part of its requirements for local Continuums of Care (CoCs) to continue to receive continuum of care funding for homeless persons, requires CoCs to conduct “one-day Point-In-Time” sheltered and unsheltered homeless counts during the last 10 days of January. The CA-609 San Bernardino City and County CoC is one of approximately 400 jurisdictions nationwide that submit an annual application to HUD for continuum of care funding.

HUD requires CoCs to conduct a sheltered count every year and an unsheltered count every other year. The San Bernardino City and County CoC conducts an annual unsheltered count, as do more than half of California’s 44 CoCs.

### *When was the count conducted?*

The sheltered count included residents of shelters and transitional housing programs throughout the county who slept in these facilities during the night of January 24 through the early morning of January 25. The unsheltered homeless count was conducted on Thursday, January 25, 2024, and began at 6 a.m.

HUD allows counting in hard-to-reach and remote places to continue up to seven days after the count if persons are asked if they were homeless on the day of the count and a unique identifier is used to prevent duplication. A limited amount of counting occurred during the seven days following the count in a few hard-to-reach and remote places.

### *Who was counted?*

Per HUD’s instructions, a person was considered homeless, and thus counted, only when they fell within the HUD-based definition by residing in one of the places described below:

- In places not meant for human habitation, such as cars, parks, sidewalks, and abandoned buildings;
- In an emergency shelter; and
- In transitional housing for homeless persons.

Each person who was counted was also asked a series of survey questions that ensured that all HUD-required subpopulation data was collected that included adults with:

- HIV/AIDS;
- Serious mental illnesses; and
- Substance use disorders.

Subpopulations also included:

- Families;
- Chronically homeless families and individuals;
- Veterans; and
- Youth age 18–24.

Asking adult survivors of domestic violence survey questions is optional according to HUD.

Several questions to gather locally desired information were also asked and include:

- Did you become homeless for the first time during the past 12 months?
- Has a doctor or other medical professional ever told you that you have a chronic health condition that is life-threatening, such as heart, lung, liver, kidney, or cancerous disease?
- Have you been incarcerated during the last 12 months?
- Have you ever been in foster care?
- How much is your monthly income?
- In which city/community did you first become homeless?
- In which state were you born?
- Where did you sleep last night?

#### *Who was not counted?*

Per HUD’s instructions, a person was not considered homeless if the person resided in one of the following places:

- Medical facilities, such as hospitals, psychiatric facilities, and nursing homes;
- Jails, prisons, or juvenile detention facilities;
- Chemical dependency facilities, such as substance use treatment facilities and detox centers; and
- Foster care homes or foster care group homes.

Also, per HUD’s instructions, children identified by McKinney-Vento Homeless Coordinators at schools as homeless should not be counted. Schoolchildren living in an emergency shelter or transitional housing program will be counted as part of the sheltered count and counted as part of the unsheltered count if unsheltered.

Lastly, HUD does not consider persons who are “doubled up,” or persons who are “near homelessness” to be homeless but considers them to be at risk of becoming homeless. Thus, such persons were not included in the homeless count.

San Bernardino County, like many other counties, has a substantial number of households that are at risk of becoming homeless. The Census Bureau noted that 13.5% or approximately 91,000 households (consisting of approximately 300,000 residents) in the county were living at or below the poverty level as reported in the 2022 American Community Survey.

Many of these persons can become homeless because of social structural issues such as increases in rent, loss of jobs, and rising healthcare costs. In addition, personal experiences such as domestic violence, physical disabilities, mental illness, and substance use can cause members of a low-income household or an entire household to become homeless. Often, one or more of these causes factor into a household’s homelessness experience.

#### *Who carried out the count?*

The homeless count and subpopulation survey was a joint effort of the San Bernardino County Homeless Partnership, the San Bernardino County Office of Homeless Services, and the Institute for Urban Initiatives. San Bernardino County had approximately 550 community volunteers serve as counters. As noted in the Acknowledgements section of this report, there were 24 cities and towns that contributed staff time and office space for the training and deployment of counters. There were 24 law enforcement agencies that provided their time, knowledge, and expertise regarding locations of homeless persons. Also, there were several non-profit agencies, faith-based organizations, homeless providers, and County departments that helped with the planning process, including the San Bernardino County Innovation and Technology Department (ITD), which created maps to guide counters.

**The San Bernardino County Homeless Partnership (SBCHP)** was formed to provide a more focused approach to issues of homelessness within San Bernardino County. Its primary purposes are to develop a countywide public and private partnership and to coordinate services and resources to reduce homelessness in San Bernardino County. The partnership consists of community and faith-based organizations, educational institutions, non-profit organizations, private industry, and federal, state, and local governments. SBCHP was developed to promote a strong collaboration between agencies to direct the planning, development, and implementation of the county’s strategy to prevent and reduce homelessness. The partnership provides leadership in creating a comprehensive countywide network of service delivery to homeless and near-homeless households by facilitating better communication, planning, coordination, and cooperation among all entities that provide services and/or resources to relieve homelessness.

**The San Bernardino County Office of Homeless Services (OHS)** serves as a “clearinghouse” of homeless issues for all County departments. Any homeless issues encountered by County staff can be referred to this office for resolution. OHS staff plays a vital role in SBCHP as the administrative support unit to the organization. OHS ensures that SBCHP’s vision, mission, and goals are carried into effect.

**The Hub for Urban Initiatives** consists of several community- and faith-based institutes that respond to the economic, housing, and social needs of neighborhoods, cities, and counties from local community, regional, national, international, and faith-based perspectives. Urban Initiatives has completed over 100 assessments for local government and private organizations throughout Southern California that have focused on affordable housing, business development and education for micro-businesses, fair housing, homelessness, migrant farming, and street vending.

# METHODOLOGY

## *Unsheltered Homeless Count and Survey*

To conduct the count, Esri's ArcGIS software platform was used. The 2024 Homeless Point-In-Time Count was a configuration of Survey 123 for ArcGIS and Operations Dashboard for ArcGIS that was used by OHS in partnership with ITD to conduct the 2024 homeless count and survey.

Homeless Point-In-Time Count efforts included the following applications:

- Homeless count survey, which included more than 20 questions to meet HUD requirements concerning the collection of data for HUD-designated subpopulations and to meet local requests for additional information about the homeless population;
- Homeless count dashboard, which was used to monitor results of the Point-In-Time Count in real time; and
- Homeless count results application that provided for instant viewing of data and tables that detailed Point-In-Time Count results.

A digital survey form was designed to simplify the surveyor's experience; only relevant questions were displayed based on the answers input, eliminating the need for surveyors to devote time and effort to determining which questions to ask and resulting in a streamlined surveying experience.

Additional logic was built into the form to perform calculations behind the scenes. For example, the form combined the answers from a subset of questions to determine whether the respondent met HUD's definition of chronically homeless and calculated the result as the survey was completed. Extensive testing was conducted to ensure the various combinations of factors were all successfully calculated to a correct result. These calculations allowed for real-time monitoring of such metrics as the count was taking place using an Operations Dashboard, ultimately eliminating the need for the calculations after the count was completed.

An added benefit of using digital surveys was the capture of location information. When a survey was conducted, the global positioning system (GPS) location of the surveyor's mobile device was captured, providing the geographic location of where the survey took place, and opening up opportunities for mapping and analyses. (For safety and privacy reasons, location information was not captured for surveys of sheltered homeless persons.) Upon completion of the count, the data were examined and scrubbed to remove any invalid records, such as practice surveys submitted before the official start of the count. Steps were also taken to ensure that duplicate records – instances where the same individual was surveyed more than once in the same location – were identified and removed.

### ***Closer monitoring of undercounted areas***

As previously noted, the Esri Survey 123 app provided the ability for a homeless count dashboard, which was used to monitor results of the Point-In-Time Count in real time. This provided instant viewing of data points on the dashboard in the command center during the time of the count. Each data point represented a household counted.

During the count, if data points did not appear in areas where homeless persons were known to live, volunteers were sent to the area to count, and persons counted were included in the total count if they had not been previously counted.

After the count, if data points did not appear in areas where homeless persons were known to live, professional outreach workers were sent to those areas the next day and persons were included in the total count if they had not been previously counted. HUD allows for next day counting based upon two conditions: 1) any homeless persons encountered must be asked if they were homeless on the day of the count, and 2) a unique identifier must be created for that person.

A unique identifier was created for all persons counted on the day of the count and the day after the count. If the same unique identifier appeared twice, it was assumed that it was the same person; also, a person was only included once in the total count if the person stated "yes" when asked "if they were homeless on the day of the count," which was Thursday, January 25.

### ***Analyzing the subpopulation data***

Only adults and unaccompanied teenage children who are counted are surveyed; accompanied children in families are not surveyed. Of the 3,018 adults and unaccompanied children under 18 counted, 1,654 or 55% were surveyed and 1,364 or 45% were observed. Counters were instructed to record "no" in the digital survey form for question 4, "Are you able to interview this person" and to give their best guess-estimate for questions 4–6, which asked for gender, age, and race/ethnicity, if they believed there was a safety issue, if a person was sleeping, or if a person refused to be interviewed.

## *Sheltered Homeless Count*

HUD encourages the use of Homeless Management Information System (HMIS) data to generate sheltered counts and subpopulation data for programs with 100% of beds participating in HMIS. Therefore, HMIS was used to gather the total number of occupied beds and the number of persons for each subpopulation.

A data collection instrument was used to collect the total number of occupied beds and the number of persons for each subpopulation for non-participating HMIS programs and for HMIS participating agencies whose HMIS data is incomplete and/or incorrect. The same questions used to collect subpopulation data through HMIS were used for the data collection instrument.

## Unsheltered Homelessness

Of the 4,237 persons counted as homeless in 2024, 3,055 or nearly three-fourths (72.1%) were unsheltered, which is defined by HUD as:

“An individual or family who lacks a fixed, regular, and adequate nighttime residence, meaning: (i) An individual or family with a primary nighttime residence that is a public or private place not designed for or ordinarily used as a regular sleeping accommodation for human beings.”

HUD also requires that the total number of unsheltered and sheltered adults be broken down by various subpopulations, including age, gender, race, and ethnicity. Of the 3,055 unsheltered persons counted, 3,012 were adults, 6 were unaccompanied children under age 18, and 17 were accompanied children under age 18 in families.

HUD requires that the following demographic information be included in the Point-In-Time Count chart submission to HUD: gender, race/ethnicity, and age. Thus, the following questions were included in the homeless count survey:

### What is your gender?

The following table provides a breakdown by gender for adults, unaccompanied youth under age 18, and accompanied children under age 18 in families. HUD requires gender to consist of woman (girl if child), man (boy if child), culturally specific identity, transgender, non-binary, questioning, different identity, and more than one gender.

More than two-thirds (68.5%) of adults were men and more than one-fourth (30.6%) of adults were women. Two-thirds (66.7%) of unaccompanied youth under age 18 were a boy and one-third (33.3%) were a girl. More than half (59.5%) of accompanied children under age 18 in families were boys and 40.5% were girls.

**Table 6.** Breakdown by Gender

Gender	Adults		Unaccompanied Youth Under Age 18		Accompanied Children Under Age 18 in Families	
	Number	Percent	Number	Percent	Number	Percent
Woman (Girl if child)	922	30.6	2	33.3	15	40.5

### What is your race/ethnicity?

The following table provides a breakdown of the total number of unsheltered adults and children by race/ethnicity. Nearly three-fourths (74.1%) of adults identified as Hispanic/Latina/e/o (33.3%) or White (40.8%).

**Table 7.** Breakdown by Race/Ethnicity

Gender	Adults		Unaccompanied Youth Under Age 18		Accompanied Children Under Age 18 in Families	
	Number	Percent	Number	Percent	Number	Percent
American Indian, Alaska Native, or Indigenous	63	2.1	0	0.0	0	0.0
Asian or Asian American	24	0.8	0	0.0	2	5.4

Unknown	49	1.6	1	16.7	5	13.5
<b>Total:</b>	<b>3,012</b>	<b>100</b>	<b>6</b>	<b>100</b>	<b>37</b>	<b>100</b>

## How old are you?

Table 8 offers a breakdown by age for adults according to HUD's required age groups.

Half (50.0%) of adults were age 44 or younger: 3.1% were age 18–24; 19.7% were age 25–34; and 27.2% were age 35–44.

Half (50.0%) of adults were age 45 or older: 22.0% were age 45–54; 21.4% were age 55–64; and 6.6% were age 65+.

**Table 8.** Breakdown by Age for adults

Adults	Number	Percent
Age 18–24	93	3.1
Age 25–34	593	19.7
Age 35–44	819	27.2
Age 45–54	662	22.0
Age 55–64	644	21.4
Age 65+	201	6.6
<b>Total:</b>	<b>3,012</b>	<b>100</b>

## Other Subpopulations

Table 9 provides a breakdown of other subpopulations for adults.

**Table 9.** Breakdown by Subpopulations

Subpopulations	n=3,018	
	Number	Percent
Chronically Homeless Adults	1,678	55.6
Developmental Disability	181	6.0
Families Including Chronically Homeless Families	16*	**
Persons w/HIV/AIDS	33	1.1
Persons w/Mental Health Problems	631	20.9
Physical Disability	625	20.7
Substance Users	866	28.7
Veterans***	211	7.0
Experiencing Homelessness Due to Fleeing Domestic Violence, Dating Violence, Sexual Assault, or Stalking	205	6.8

## Other Survey Questions

Other questions were included in the survey that were not required by HUD. There were 1,648 adults who responded to these survey questions.

**Table 10.** Other Survey Questions (n=1,1648)

Demographic Information	Number	Percent
Did you become homeless for the first time during the past 12 months?	592	35.9
Has a doctor or other medical professional ever told you that you have a chronic health condition that is life-threatening such as heart, lung, liver, kidney, or cancerous disease?	237	14.4
Have you ever been in foster care?	190	11.5
Have you been incarcerated during the last 12 months?	353	21.4

Other questions in the survey included:

## How much is your monthly income?

As noted in the following chart, more than three-fourths (81%) of survey respondents had either no monthly income (66%) or monthly income of \$500 or less (15%).

**Chart 2.** Monthly Income

## In what city did you first become homeless?

Table 11 notes the responses from the 1,648 adults who were interviewed. For example, 489 persons or 29.6% stated they first became homeless in the City of San Bernardino.

## SHELTERED HOMELESSNESS

Of the 4,255 persons counted in 2024, 1,200 persons or 28.2% were sheltered. Among the 1,200 sheltered persons, 844 were counted in shelters or received non-congregate shelter through a motel voucher and 356 were counted in transitional housing programs. HUD states that persons living in shelters and transitional housing programs (including safe haven programs) on the night of the count must be included in the sheltered homeless count.

**As required by HUD, the sheltered count included the number of persons and households sleeping in emergency shelters (including seasonal shelters) and transitional housing programs that were listed on the Housing Inventory Chart (HIC). In addition, any persons staying in hotels or motels paid for by a social service agency were included in the sheltered count per HUD's instructions if the voucher program was listed on the Homeless Inventory Count (HIC).**

**HUD also requires that the total number of sheltered persons be broken down by pre-designated subpopulations. The total number of sheltered persons by the pre-designated subpopulations for 2023 are listed in the table below.**

Prior to the homeless count, the HIC was specifically undated to include any new programs or exclude any programs no longer operational by OHS staff and Key Person Task Force members. A few changes were made to the HIC prior to the count.

HUD encourages the use of HMIS data to generate sheltered counts and subpopulation data for programs with 100% of beds participating in HMIS. Therefore, HMIS was used to gather the total number of occupied beds and the number of persons for each subpopulation. A data collection instrument was used to collect the total number of occupied beds and the number of persons for each subpopulation for non-participating HMIS programs. The same questions used to collect subpopulation data through HMIS were used for the data collection instrument. Thus, sheltered count data for all sheltered programs was gathered either through a data collection instrument or HMIS.

The following table provides a breakdown by age of the sheltered population of 1,200 adults and children as required by HUD.

**Table 12.** Age Table for Sheltered Population

Subpopulation	Number	Percent
Under Age 18	268	22.3
Age 18–24	70	5.9
Age 25–34	177	14.8
Age 35–44	219	18.3
Age 45–54	184	15.3
Age 55–64	147	12.2
Age 65+	135	11.2
<b>Total:</b>	<b>1,200</b>	<b>100</b>

The following table provides a breakdown by gender of the sheltered population of 1,182 adults and children as required by HUD.

**Table 13.** Gender Table for Sheltered Population

Chronically Homeless Families (total persons)	7	0.6
Chronically Homeless Individuals	233	19.4
Chronically Homeless Veteran Individuals	6	0.5
Youth Under Age 18-Households w/only children	7	0.6

\*890 households consists of 1,200 adults and children.

## KEY FINDINGS

1. The number of adults and children counted as homeless increased by 1% when the 2024 Point-In-Time homeless count of 4,255 is compared to the 2023 Point-In-Time homeless count of 4,195
2. The number of adults and children counted as unsheltered increased by 2.6% when the 2024 unsheltered count of 3,055 is compared to the 2023 unsheltered count of 2,976.
3. The number of adults and children counted as sheltered decreased by 1.6% when the 2024 sheltered count of 1,200 is compared to the 2023 sheltered count of 1,219.
4. Approximately three-fourths (75.5%) or 3,200 of the 4,237 homeless adults and children were counted within seven cities that include Barstow, Colton, Fontana, Ontario, Redlands, San Bernardino, and Victorville.
  - a. These seven cities accounted for 2,187 or nearly three-fourths (71.6%) of the total unsheltered population of 3,055 and 1,013 or 85.7% of the 1,182 persons counted in shelters and transitional housing.
5. More than one-third (35.9%) of unsheltered adults and children counted as homeless became homeless for the first time during the 12 months prior to the homeless count.
6. Nearly one-third (29.6%) of unsheltered adults stated “City of San Bernardino” when asked in what city did you first become homeless.
7. More than half (55.6%) of unsheltered adults were chronically homeless, which is defined by HUD as being homeless for one year or more and having a disabling condition such as mental illness, chronic health condition, and a physical disability.
8. Nearly one-fourth (21.4%) of unsheltered adults answered “yes” when asked if they had been incarcerated during the past 12 months.
9. Two-thirds (66%) of unsheltered adults answered “no income” when asked to state their monthly income.
10. More than three-fourths (81%) of unsheltered adults answered either “no income” (66%) or “less than \$500” (15%) when asked to state their monthly income.

## ACKNOWLEDGEMENTS

The San Bernardino County Homeless Partnership wishes to thank all the individuals and organizations that contributed to the preparation, implementation, and success of the 2024 Point-In-Time Count and Subpopulation Survey. Obtaining this data is essential to developing data-driven solutions for preventing and ending local homelessness. Such an endeavor would not be possible without the collaboration and efforts of volunteers, community groups, faith- and community-based organizations, county departments, city representatives and staff, homeless service providers, law enforcement, and elected officials. Your hard work, time, and dedication to ending homelessness are greatly appreciated.

### Special Thanks to the following Individuals, Agencies, and Organizations

- The 550 community volunteers from across San Bernardino County who canvassed areas identified as “green count zones” the morning of January 25<sup>th</sup> to complete the 2024 Point-In-Time Count and Subpopulation Survey.
- The following agencies and community organizations that contributed staff time, support, resources, and office space for planning, training, and development activities to help make the 2024 Point-In-Time Count and Subpopulation Survey a success:

# APPENDIX B

## Unsheltered Count Survey

1. Where did you sleep last night?
  - If in a vehicle, what type of vehicle?
  - How many persons, including yourself, slept overnight in the same vehicle?
2. What is the first initial of your first name?
3. What is the first initial of your last name?
4. What is your gender?
5. How old are you?
6. What is your race/ethnicity?
7. In what state were you born?
  - If the person was born outside of the United States, select “Outside of the U.S.” and note what country.
8. In what city/community did you first become homeless?

*Note: Questions 10 and 11 were asked to help determine if the person was chronically homeless according to HUD’s definition.*

9. Did you become homeless for the first time during the past 12 months?
10. Have you been living in a shelter and/or on the streets, in abandoned buildings, or in a vehicle for the past year or more?
11. Have you been living in a shelter and/or on the streets, in abandoned buildings, or in a vehicle at least four (4) separate times during the last three (3) years, including now?
12. Have you served in the United States Armed Forces?

- If no, were you ever called into active duty as a member of the National Guard or as a Reservist?
13. Do you have any of the following disabilities or disorders that make it difficult for you or seriously limit your ability to live independently?
    - Long-lasting physical disability;
    - Long-lasting developmental disability;
    - Serious mental illness or emotional impairment; or
    - Substance use disorder.
  14. Have you been diagnosed with AIDS or tested positive for HIV?
  15. Has a doctor or other medical professional ever told you that you have a chronic health condition that is life-threatening, such as heart, lung, liver, kidney or cancerous disease?
