San Bernardino County 2018 Homeless Count and Subpopulation Survey Final Report

March 2018

Acknowledgements

Key Findings

The San Bernardino County Continuum of Care (CoC) Point-In-Time Count (PITC) is a federally mandated census of persons experiencing homelessness in the county. All jurisdictions and communities that receive federal funding from the U.S. Department of Housing and Urban Development (HUD), as authorized by the Homeless Emergency Assistance and Rapid Transition to Housing (HEARTH) Act of 2009, have to conduct a homeless count. The census includes an unduplicated count of unsheltered and sheltered individuals and families experiencing homelessness on a given night in the last ten days in January.

The PITC provides local communities and policy makers with information on the characteristics and magnitude of the homeless population to make informed decisions in addressing homelessness in their region.

1. **All Homeless Persons**: There were a total of 2,118 persons who were homeless on January 25, 2018. The previous homeless count was completed in 2017, when 1,866 persons were counted. A comparison of the last two counts reveals that 252 more persons were counted in 2018, which represents an increase of 13.5%.

2. **Unaccompanied Women**: There were a total of 349 unaccompanied women unsheltered in 2018 and 284 in 2017, which represents an increase of 65 women or 22.9%. Of the 349 unaccompanied women in 2018, 86 or 24.8% were chronically homeless. Of the 284 unaccompanied women in 2017, 38% were chronically homeless.

3. **Chronically Homeless**: There were a total of 348 unsheltered chronically homeless persons in 2018 and 427 in 2017, which represents a decrease of 79 persons or 18.5%. Of the 348 persons, 167 or 48% had a chronic health condition, 160 or 46% had a physical disability, and 15 or 4.3% had HIV/AIDS.

4. **Veterans**: There were 125 unsheltered veterans in 2018 and 111 in 2017, which represents an increase of 14 veterans or 12.6%. Veterans represented 10 percent of the total homeless adult population in 2017 and nine (9) percent in 2018.

5. **Youth Age 18 - 24**: There were 113 unsheltered youth in 2018 and 122 in 2017, which represents a slight decrease of nine (9) youth or 7.4%. Youth ages 18 – 24 represented 10.3% of the total homeless adult population in 2017 and 8.2% in 2018. This is consistent with national estimates of unsheltered homeless youth.

6. **Families**: There were 29 unsheltered families in 2018 and 15 in 2017, which represents an increase of 14 families or nearly 100%. The 29 families in 2018 consisted of 34 adults and 69 children and 18 adults and 26 children in 2017.

Table of Contents

I. Executive Summary

There were 2,118 persons who were homeless on January 25, 2018. The previous homeless count and subpopulation survey was completed in 2017 during which 1,866 persons were counted. A comparison of the last two counts reveals that 252 more persons were counted in 2018, which represents an increase of 13.5%.

Table 1. Comparison of 2017 and 2018 Homeless Counts

	Sheltered	Unsheltered	Total
2017 Homeless Count	687	1,179	1,866
2018 Homeless Count	675	1,443	2,118
Difference:	-12 (-1.7%)	+264 (+22.4%)	+252 (+13.5%)

The following table provides a breakdown of the total number of sheltered and unsheltered persons counted in 2018 by jurisdiction.

*Twenty-four (24) of the beds are part of a Safe Haven.

Table 3 notes that nearly two-thirds (64.2%) or 1,360 of the 2,118 homeless adults and children were counted within six cities that include Barstow, Ontario, Redlands, San Bernardino, Upland, and Victorville. Also, these six cities accounted for 60.6% of the total unsheltered population as well as 72% of persons counted in shelters and transitional housing including a safe haven program.

Total:	**244**	**242**	**874**	**1360**

<u>Unsheltered Persons</u>

Of the 2,118 persons counted in 2018, 1,443 or 68.1% were unsheltered, which is defined by the U.S. Department of Housing and Urban Development (HUD) as

> "An individual or family who lacks a fixed, regular, and adequate nighttime residence, meaning: (i) An individual or family with a primary nighttime residence that is a public or private place not designed for or ordinarily used as a regular sleeping accommodation for human beings."

HUD also requires that the total number of unsheltered and sheltered adults be broken down by various subpopulations including age, gender, race, and ethnicity. Of the 1,443 unsheltered persons counted, 1,370 were adults, 4 were unaccompanied youth under age 18, and 69 were children under age 18 in families.

Gender

The following table provides a breakdown by gender for adults, unaccompanied youth under age 18, and children in families under age 18. HUD requires the summary to consist of men, women, transgender, and gender non-conforming (i.e., not exclusively male or female).

Table 4. Gender

	Adults		Unaccompanied Youth Under Age 18	
Male	938	68.5	4	100
Female	361	26.3	0	0
Transgender	10	0.7	0	0
Gender Non-Conforming	2	0.2	0	0
Unknown	59	4.3	0	0
Total:	**1,370**	**100**	**4**	**100**

Ethnicity

Table 5 offers a breakdown by ethnicity. HUD requires the summary to consist of Hispanics or Latinos and non-Hispanics or Latinos.

Table 5. Ethnicity

	Adults		Unaccompanied Youth Under Age 18	
	#	%	#	%
Hispanic or Latino	329	24.0	1	25
Non-Hispanic or Latino	736	53.7	2	50
Unknown	305	22.3	1	25
Total:	**1,370**	**100**	**4**	**100**

Race

Table 6 provides a breakdown by race. It is important to note that instructions from HUD were to include Hispanics or Latinos in the race categories listed below because the designation "Hispanic or Latino" does not denote race.

Table 6. Race

	Adults		Unaccompanied Youth Under Age 18	
	#	%	#	%
American Indian or Alaska Native	21	1.5	0	0
Asian	8	0.6	0	0

Victims of Domestic Violence	213	15.5
Experiencing Homelessness Because Fleeing Domestic Violence, Dating Violence, Sexual Assault, or Stalking	96	7.0

*Of the 29 families, seven (7) were chronically homeless.

**The total number of adults in the 29 families was 34 and represents 2.5% of the total adult population of 1,378.

*** 36% or 45 veterans were chronically homeless Individuals.

Sheltered Persons

Of the 2,122 persons counted in 2018, 675 persons or 31.8% were sheltered. Among the 675 sheltered persons, 356 were counted in shelters or received a motel voucher and 319 were counted in transitional housing programs, including a safe haven program. HUD states that persons living in shelters or transitional housing programs (including safe haven programs) on the night of the count must be included in the homeless count and subpopulation survey.

As required by HUD, the sheltered count included the number of persons and households sleeping in emergency shelters (including seasonal shelters) and transitional housing programs that were listed on the Housing Inventory Chart (HIC). In addition, any persons staying in hotels

or motels as a result of receiving a voucher from a social service agency were included in the sheltered count per HUD's instructions if the voucher program was listed on the HIC.

HUD also requires that the total number of sheltered persons be broken down by pre-designated subpopulations. The total number of sheltered persons by the pre-designated subpopulations for 2018 are listed in the table below.

The HIC was submitted by the Office of Homeless Services (OHS) staff to HUD in May, 2017. Prior to the homeless count, the HIC was specifically undated to include any new programs or exclude any programs no longer operational by OHS staff and Key Person Task Force members. A few changes were made to the HIC prior to the count.

HUD encourages the use of Homeless Management Information Services (HMIS) data to generate sheltered counts and subpopulation data for programs with 100% of beds participating in HMIS. Thus, HMIS was used to gather the total number of occupied beds and the number of persons for each subpopulation. A "Data Collection Instrument" was used to collect the total number of occupied beds and the number of persons for each subpopulation for non-participating HMIS programs and for HMIS participating agencies that do not have their HMIS data complete and correct. The same questions used to collect subpopulation data through HMIS were used for the data collection instrument. Thus, sheltered count data for all sheltered programs was gathered either through a data collection sheet or HMIS.

The following table provides a breakdown of the sheltered population (675 adults and children) by the subpopulations required by HUD.

Table 9. Sheltered Population by Subpopulations

Subpopulation	Number	Percent
American Indian or Alaska Native	11	2
Asian	0	0
Black/African American	205	30
Chronically Homeless Families (# of families)	4	1

White	353	52
Youth Ages 18 - 24	42	6
Youth Under Age 18-Households w/only children	3	0

*There were 363 households that made up the total number of sheltered persons, which was 675.

Next Steps: Implementing Recommendations to End Homelessness for Pre-identified Subpopulations

This section outlines six (6) steps that the San Bernardino County Continuum of Care should take to help end homelessness. These steps are aligned with the County of San Bernardino 10-Year Strategy to End Homelessness and are also aligned with several evidence-based and best practices that have helped achieve unprecedented decreases in the total number of homeless persons, particularly among families, chronic homeless persons, and veterans, across the country since 2005.

The six (6) steps include:

1. **Encourage each city to adopt their unsheltered homeless count numbers as baseline numbers.**

Each city should be encouraged to adopt the results of the unsheltered homeless count in their jurisdiction as noted in the following table. After adopting their numbers, each city should be encouraged to implement steps 1 – 3 above in order to end homelessness among chronically homeless individuals and families, unaccompanied women, unaccompanied youth under age 18, veterans, and youth ages 18 – 24 within their jurisdiction.

Table 10. Jurisdictions by Selected Unsheltered Subpopulations.

Jurisdiction	Chronically Homeless Persons	Families	Unaccompanied Women	Unaccompanied Youth: Under Age 18	Veterans	Youth: Ages 18-24

Total:	**348**	**29**	**348**	**4**	**125**	**113**

2. **Completely align with a Housing First model and low barrier approach for chronically homeless individuals and families.**

Aligning a coordinated system with a Housing First and low barrier approach will help chronically homeless households obtain and maintain permanent affordable housing, regardless of their service needs or challenges, by removing barriers that hinder them from obtaining and maintaining permanent affordable housing.

Chronically homeless persons can achieve stability in permanent housing, regardless of their service needs or challenges, if provided with appropriate levels of services. Through this approach, barriers are removed that have hindered homeless persons from obtaining housing such as too little income or no income; active or history of substance use; criminal record, with exceptions for state-mandated restrictions, and history of having been or currently a victim of domestic violence (e.g., lack of a protective order, period of separation from abuser, or law enforcement involvement). Furthermore, through this approach barriers that have hindered homeless persons from maintaining housing are removed, such as failure to participate in supportive services; failure to make progress on a service plan; loss of income or failure to improve income; and fleeing domestic violence.

3. **Completely align with a rapid rehousing and low barrier approach for non-chronically homeless individuals and families.**

Aligning a coordinated system with a rapid rehousing and low barrier approach will help non-chronically homeless households obtain and maintain permanent affordable housing regardless

of their service needs or challenges by removing barriers that hinder them from obtaining and maintaining permanent affordable housing.

Rapid rehousing assistance helps individuals and families quickly exit homelessness to permanent housing. Rapid rehousing assistance is offered without preconditions (such as employment, income, absence of criminal record, or sobriety), and the resources and services provided are typically tailored to the unique needs of the household. The core components of a rapid re-housing program include housing identification services, financial assistance for rent and move-in, and accompanying case management and supportive services. While the program has all three-core components available, it is not required that a household utilize them all.

4. **Align the current homeless services delivery system with a goal of ending homelessness among unaccompanied women by 2020.**

Unaccompanied women experiencing homelessness often present with complex histories of cumulative trauma exposure, substance use, mental illness, and chronic disease among other conditions and circumstances. However, despite evidence that housing along with supportive services is the best intervention to end homelessness, continuums of care across the country have yet to identify the nature of specific interventions through a gender lens. Identifying interventions that benefit and maximize women's access to services as well as housing with supportive services is an overdue priority. Trauma-informed care should be a top priority.

There is room for innovation. Identifying factors that promote housing retention and housing stability among women is highly encouraged. This includes interventions aligned with a Housing First approach that work best to support the ultimate goals of housing, promotion of wellbeing, and the promotion of thriving or human flourishing for women who have experienced homelessness.

5. **Increase the Number of Permanent Supportive Housing Units.**

Each jurisdiction should consider increasing its number of permanent supportive housing units in order to meet the needs of those homeless persons with disabling conditions who were counted within its neighborhoods. These persons are noted by jurisdiction in Table 10 and include persons with mental illness, substance abuse, and physical disabilities. Jurisdictions with significant numbers of chronic homeless persons, veterans, and persons recently released from correctional institutions after serving a court-mandated sentence should also consider increasing their number of permanent supportive housing units. Increases in units should be based on evidence-based practices to ensure success.

Permanent Supportive Housing provides long-term affordable rental housing and a broad range of on-site and/or off-site wrap-around supportive services. The goal is to increase independent living skills of residents who pay no more than 30% of their monthly income for rent so that they are able to maintain their housing. Those persons without permanent disabling conditions may ultimately become self-sufficient while living in affordable housing and may eventually pay 100% of their rent and may or may not need supportive services.

Particular attention should be given to persons recently released from correctional institutions since realignment has resulted in thousands of prisoners being released or transferred to county jails. As noted in Table 8, 22.3% of male and female adults counted answered "yes" when asked if they were released from a correctional institution such as a jail or prison during the past 12 months after serving a court-ordered sentence.

Permanent supportive housing for ex-offenders should be based on evidence-based practices that have resulted in optimal outcomes for homeless ex-offenders reentering communities. These practices include the provision of housing with appropriate wrap-around services such as substance abuse counseling and treatment and life coping skills that help ex-offenders successfully transition into local communities. These practices also include a clear path to career development and/or employment and reunification with family members including children.

Optimal outcomes include reductions in recidivism and recurrence of homelessness. The chances of recidivism significantly lessen when offenders are reengaged with family members and in particular with their children. The chances of recidivism also significantly lessen when offenders develop marketable skills that lead to on-going employment. Employment also encourages ex-offenders to take the initial steps to reunite with family members. The chances of ex-offenders becoming homeless again also significantly lessen with on-going employment and efforts to foster relationships with family members after reunification.

6. **Increase Rapid Rehousing Assistance**

Rapid rehousing assistance helps individuals and families quickly exit homelessness to permanent housing. Rapid rehousing assistance is offered without preconditions (such as employment, income, absence of criminal record, or sobriety), and the resources and services provided are typically tailored to the unique needs of the household. The core components of a rapid re-housing program include housing identification services, financial assistance for rent and move-in, and accompanying case management and supportive services. While a rapid re-housing program has all three-core components available, it is not required that a household utilize them all.

II. Background Information

HUD, as part of its requirements for local jurisdictions to continue to receive continuum of care funding for homeless persons, asks local jurisdictional applicants to conduct a "one-day point-in-time" homeless count every other year during the last 10 days of January. The County of San Bernardino is one of more than 400 jurisdictions that submit an annual application to HUD for continuum of care funding.

When was the count conducted?

The homeless count was conducted on the streets during the hours of 6 a.m. and 10 a.m. on January 25, 2018. The count was also conducted on the same day in shelters and transitional housing programs throughout the county for persons who slept in these programs beginning the night before.

HUD does allow counting under certain circumstances such as hard-to-reach and remote places up to a week after the count as long as persons were asked if they were homeless on the day of the count and a unique identifier is used to prevent duplication. A limited amount of counting occurred during the Monday and Tuesday following the count in a few hard-to-reach and remote places. Persons were asked if they were homeless on the day of the count and a unique identifier was used to prevent duplication as described in the Methodology section below.

Who was counted?

Per HUD's instructions, a person was considered homeless, and thus counted, only when he/she fell within the HUD-based definition by residing in one of the places described below:

- In places not meant for human habitation, such as cars, parks, sidewalks, and abandoned buildings;
- In an emergency shelter; and
- In transitional housing for homeless persons.

Who was not counted?

Per HUD's instructions, a person was not considered homeless if the person resided in one of the following places noted below

- Medical facilities, such as hospitals, psychiatric facilities, and nursing homes;
- Jails, prisons or juvenile detention facilities;

- Chemical dependency facilities, such as substance abuse treatment facilities and detox centers;
- Foster care homes or foster care group homes.

Also, per HUD's instructions, children identified by McKinney-Vento Homeless Coordinators at schools as homeless should not be counted. Children may be counted during the count if they live in an emergency shelter or transitional housing program, or if they are unsheltered.

Lastly, HUD does not consider the following persons to be homeless—persons who are "doubled up," or persons who are "near homelessness"—but considers them to be at risk of becoming homeless. Thus, such persons were not included in the homeless count.

The County of San Bernardino, like many other counties, has a substantial number of households that are at risk of becoming homeless. The Census Bureau noted that 18 percent or nearly 132,000 households consisting of about 400,000 residents in San Bernardino County were living below poverty level as reported in the 2017 American Community Survey. Also, according to the U.S. Census Bureau there were more than 120,000 households consisting of about 400,000 persons (nearly one of every five residents) in San Bernardino County who were members of a household whose annual income was less than $25,000 in 2017. There were approximately 65,000 households consisting of approximately 200,000 persons whose annual income was less than $15,000 a year.

Many of these persons can become homeless because of social structural issues such as increases in rent, loss of job, and rising health care costs. In addition, personal experiences such as domestic violence, physical disabilities, mental illness, and substance abuse can cause members of a low-income household or an entire household to become homeless. Often, one or more of these experiences factor into a household's homeless experience.

Who carried out the count?

The homeless count and subpopulation survey was a joint effort of the San Bernardino County Homeless Partnership, the San Bernardino County Office of Homeless Services, and the Institute for Urban Initiatives. Over 400 community volunteers were recruited to implement the count and subpopulation survey. As noted in the Acknowledgements section of this report, there were nearly 30 agencies that contributed staff time and office space for training and deployment of counters and there were 24 law enforcement agencies that provided their time, knowledge, and expertise concerning locations of homeless persons. Also, there were nearly 30 additional agencies that helped with the planning process, including the San Bernardino County Information Services Department, which created maps to guide counters.

The San Bernardino County Homeless Partnership (SBCHP) was formed to provide a more focused approach to issues of homelessness within the County. Its primary purpose is to develop a countywide public and private partnership and to coordinate services and resources to end homelessness in San Bernardino County. The Partnership consists of community and

faith-based organizations, educational institutions, non-profit organizations, private industry, and federal, state, and local governments. SBCHP was developed to promote a strong collaboration between agencies to direct the planning, development, and implementation of the County's 10-year Strategy to end chronic homelessness. The Partnership provides leadership in creating a comprehensive countywide network of service delivery to the homeless and near homeless families and individuals through facilitating better communication, planning, coordination, and cooperation among all entities that provide services and/or resources to relieve homelessness.

The San Bernardino County Office of Homeless Services (OHS) serves as a "clearing house" of homeless issues for all County departments. Any homeless issues encountered by County staff can be referred to this office for resolution. OHS staff plays a vital role in the San Bernardino County Homeless Partnership as the administrative support unit to the organization. OHS insures that the vision, mission and goals of the Partnership are carried into effect.

The Institute for Urban Initiatives consists of several community-based and faith-based institutes that respond to the economic, housing, and social needs of neighborhoods, cities, and counties from local community, regional, national, international, and faith-based perspectives and has completed over 50 assessments for local government and private organizations throughout Southern California that have focused on affordable housing, business development and education for micro-businesses, fair housing, homelessness, migrant farming, and street vending. For more information visit www.urban-initiatives.org.

III. Methodology

<u>Unsheltered Count and Subpopulation Survey</u>

In order to complete the unsheltered count and subpopulation survey, the following activities were conducted: 1) organizing the count and subpopulation survey; 2) coordinating the count and subpopulation survey; and 3) implementing the count and subpopulation survey.

1. Organizing the Count and Subpopulation Survey

Organizing the count consisted of the following four activities: a) the county was divided into organizational regions; b) the organizational regions were divided into planning communities; c) the planning communities were divided into implementation areas; and d) the implementation areas were divided into count zones.

a. County was Divided into Organizational Regions

The County was divided into the following organizational regions:

- **West Valley** which consisted of the area west of the City of San Bernardino including the cities of Chino, Chino Hills, Colton, Fontana, Montclair, Ontario, Rancho Cucamonga, Rialto, Upland and the surrounding unincorporated areas.

- **East Valley** which consisted of the City of San Bernardino and all areas south and east including the cities of Grand Terrace, Highland, Loma Linda, Redlands, Twenty-nine Palms, Yucaipa, Yucca Valley and the surrounding unincorporated communities along with the San Bernardino Mountain communities.

- **High Desert** which consisted of the area north of the San Bernardino Mountains including the cities of Adelanto, Apple Valley, Barstow, Hesperia, Needles, Victorville and the surrounding unincorporated communities.

b. Organizational Regions were Divided into Planning Communities

Each of the three Organizational Regions was divided into 20 planning communities of incorporated cities and/or unincorporated jurisdictions in order to plan and implement the activities below. The County consists of 24 incorporated cities and over three dozen unincorporated communities. However, not all of these cities and counties were included in the 20 planning communities because they were determined by key persons as not having any homeless persons who live, congregate, or receive services. The table below lists the

incorporated cities and unincorporated communities within each of the 20 planning communities.

#	Community Planning Area	Incorporated Cities & Unincorporated Communities
1	Barstow	City of Barstow and the unincorporated communities of Baker, Fort Irwin, Lenwood, Searles Valley, and Yermo.
2	Big Bear Region	City of Big Bear Lake and the unincorporated communities of Big Bear City, Crestline, Lake Arrowhead, and Running Springs.
3	Chino	City of Chino
4	Chino Hills	City of Chino Hills
5	Colton	City of Colton
6	Fontana	City of Fontana and the unincorporated communities of Bloomington and Lytle Creek.
7	Grand Terrace	City of Grand Terrace
8	High Desert	Cities of Adelanto, Apple Valley, Hesperia, Victorville, and the unincorporated communities of Lucerne Valley, Mountain View Acres, Oak Hills, Phelan, Pinon Hills, Silver Lake, Spring Valley Lake, and Wrightwood.
9	Highland	City of Highland
10	Loma Linda	City of Loma Linda
11	Montclair	City of Montclair
12	Morongo Basin	Cities of Twentynine Palms and Yucca Valley and the unincorporated communities of Homestead Valley, Joshua Tree, and Morongo Valley.
13	Needles	City of Needles and the unincorporated communities of Big River and Bluewater.
14	Ontario	City of Ontario
15	Rancho Cucamonga	City of Rancho Cucamonga
16	Redlands	City of Redlands and the unincorporated community of Mentone.
17	Rialto	City of Rialto
18	San Bernardino	City of San Bernardino and the unincorporated community of Muscoy.
19	Upland	City of Upland and the unincorporated community of San Antonio Heights.
20	Yucaipa	City of Yucaipa and the unincorporated community of Oak Glen.

c. Planning Communities were Divided into Implementation Areas

Each of the Planning Communities was divided into Implementation Areas, which were designated as Red, Yellow, or Green Areas according to the definitions below.

- **Red Areas** were defined as implementation areas where there are no homeless persons as determined by local community representatives and stakeholders;

Red areas included those areas that are either remote and/or uninhabitable, which were primarily small rural communities that are spread throughout the desert and mountain regions of the county.

- **Yellow Areas** were defined as implementation areas where only professional outreach workers might go. These areas may prove too difficult to cover and/or unsafe for volunteer counters, such as community representatives or stakeholders, in their effort to count and survey homeless persons. Immediately prior to, or immediately after the count, local professional representatives involved in the homeless count such as law enforcement or street outreach workers verified if homeless persons lived in these areas and determined the number of homeless persons who were included in the count;

- **Green Areas** were defined as implementation areas where homeless persons can be found as determined by local community representatives.

All of the incorporated cities in the county, along with significant areas within their surrounding unincorporated territory, were identified by local key person teams as Green Areas.

d. Implementation Areas were Divided into Count Zones

Implementation Areas that were designated as Green Areas were divided into Count Zones. Teams of Counters were deployed to designated count zones within each of the Green Areas. Teams of Counters were not deployed to Yellow or Red Areas.

2. Coordinating the Count and Subpopulation Survey

Coordinating the count and subpopulation survey included implementing the following activities in each local Planning Community: 1) establishing a key person team; 2) distinguishing areas within the planning community where homeless people live; 3) identifying places where homeless people live within the identified areas; 4) identifying places where homeless people receive social services; 5) raising public awareness and community involvement; and Implementing the Count and Subpopulation Survey.

a. **Establishing a Community Key Person Team**

A Community Key Person Team was established for each planning community and consisted of representatives from public and private organizations who were knowledgeable about homelessness and where homeless persons live. Such key persons included representation from business, civic, educational, faith-based, law enforcement, local government, neighborhood, and nonprofit organizations. Homeless and formerly homeless persons were also encouraged to join.

b. **Distinguishing Implementation Areas within the Planning Community**

Each Community Key Person Team distinguished implementation areas within their planning community where homeless people could be found. Such areas included a quadrant or section of a city or unincorporated area or an entire neighborhood. Those sections of the planning community where homeless persons could be found were designated as Green Areas. Conversely, those sections where homeless persons are known not to live or spend time were designated Red Areas.

c. **Identifying Verifiable Places where Homeless People Live/Congregate**

Each Community Key Person Team also identified specific locations where homeless people live and/or congregate within their designated Green Areas. Such places included abandoned buildings, commercial areas, parks, sidewalks, vacant lots and vehicles. Known encampments were also specifically identified within Green Areas. Other places included a whole neighborhood or a specific length of a street. Such information remains confidential.

d. **Identifying Places where Homeless People Receive Social Services**

Each Community Key Person Team also identified non-residential locations and/or programs where homeless people go to receive social services and other forms of assistance. Programs included locations that distributed packaged food and/or clothing, serve meals, and provide shower or laundry services, including those operated by faith-based organizations. Other program sites included those that were known to provide domestic violence, health care, mental health care, substance abuse, transportation, and veteran services for homeless persons.

e. **Raising Public Awareness and Community Involvement**

The primary purpose of raising public awareness and community involvement was to recruit volunteers to help implement the count in each planning community. Volunteers were recruited both locally and countywide from a wide-range of sources including city and county employees, homeless service providers, other social service agencies, non-profit organizations,

faith-based institutions, local businesses, civic organizations, educational institutions, currently and formerly homeless individuals and other interested community stakeholders.

Flyers and other materials were developed for distribution at community meetings and forums, media outlets and various public facilities, service locations, churches, college campuses and other public locations. A project website was established with general project information and volunteer outreach materials. Volunteer registration was also promoted through the web site during the months leading up to the day of the count.

Community involvement included creating teams of volunteers to count homeless persons in designated Green zones. Teams included persons who were involved in community service or interested in community service. Teams also included persons who had considerable exposure as well as little exposure to homelessness.

3. **Implementing the Count and Subpopulation Survey**

A homeless count and subpopulation survey instrument was used to gather data by counters. The instrument focused on gathering answers that were used to create an identifier and to determine the number of persons for each subpopulation required by HUD. All information gathered through this instrument remains confidential. Appendix A includes the instrument.

During the count, volunteers were required to collect the following information concerning every homeless person counted: first initial of first name, first initial of last name, gender, race[1], age by code[2], and state born. The information for each encounter was inputted into a data base. The information was used to create an identifier for each person. For example, a homeless person may have the following code of "WTMW6CA." This means that this person's first name began with "W", last name began with "T", he was male "M", he was White "5", in the age range of 50-61, and born in California. Ethnicity was not included in the identifier.

First Initial	Last Initial	Gender	Race	Age	State Born
W	T	M	5	6	CA

---

[1] The code for race was 1=African American or Black; 2=American Indian or Alaskan Native; 3=Asian; 4=Native Hawaiian or Pacific Islander; 5=White; and 6=Multiple races or other, 7= Don't Know, and 8=Refused to Answer.
[2] The code for age included: 1=under age 18; 2=18-24; 3=25-29; 4=30-39; 5=40-49; 6=50-61; 7=62-69; 8=70-79; and 9=80+.

If the same identifier appeared more than once, it was assumed that this was the same person and the person would only be counted once. An example to illustrate how this process worked is noted in the table below. Numbers 6 and 7 (shaded in gray) would be considered the same person. If for some reason there was doubt that numbers 6 and 7 were the same person, other data collected on the same two people would be used to address the doubt.

Number of Person	First Initial	Last Initial	Gender	Race	Age	State Born
1	J	H	F	5	6	CA
2	H	T	M	4	7	CA
3	R	K	F	4	5	TX
4	K	N	M	1	4	CA
5	F	A	M	3	3	CA
6	J	F	M	5	5	CA
7	J	F	M	5	5	CA
8	S	G	F	4	2	NY
9	D	T	M	5	6	CA
10	O	R	M	5	7	CA

The obtained data also provided the opportunity to break down the number of homeless persons counted by gender, ethnicity, age range, and state born. Thus, the questions served two purposes—basic demographic information and the prevention of duplication.

The instrument also focused on gathering answers to determine the number of persons for each of the eight subpopulations required by HUD which include:

- Chronically Homeless Individuals;
- Chronically Homeless Families;
- Persons with HIV/AIDS;
- Persons with Chronic Substance Abuse;
- Persons with Severe Mental Illness;
- Unaccompanied Youth under Age 18;
- Veterans; and
- Victims of Domestic Violence.

Other subpopulation data was also collected for

- Persons released from a Correctional Institution during past 12 months after serving a court-ordered sentence;
- Persons with a Physical Disability;
- Persons with a Developmental Disability;
- Persons with Chronic Health Conditions;
- Seniors age 62+;
- Youth Ages 18 to 24.

<u>Sheltered Count and Subpopulation Survey</u>

As required by HUD, the sheltered count included the number of persons and households sleeping in emergency shelters (including seasonal shelters), transitional housing, and Safe Haven programs (of which the County has none) that were listed on the Housing Inventory Chart (HIC). In addition, any persons staying in hotels or motels as a result of receiving a voucher from a social service agency were included in the sheltered count per HUD's instructions if the voucher program was listed on the HIC.

The HIC was submitted by the Office of Homeless Services (OHS) staff to HUD in May, 2017. Prior to the homeless count, the HIC was specifically left undated to include any new programs or exclude any programs no longer operational by OHS staff and Key Person Task Force members. A few changes were made to the HIC prior to the count.

HUD encourages the use of Homeless Management Information Services (HMIS) data to generate sheltered counts and subpopulation data for programs with 100% of beds participating in HMIS. Thus, HMIS was used to gather the total number of occupied beds and the number of persons for each subpopulation. A "Data Collection Instrument" was used to collect the total number of occupied beds and the number of persons for each subpopulation for non-participating HMIS programs and for HMIS participating agencies that do not have their HMIS data complete and correct. The same questions used to collect subpopulation data through HMIS were used for the data collection instrument. Thus, sheltered count data for all sheltered programs was gathered either through a data collection sheet or HMIS.

The following table provides a breakdown of the sheltered population (675 adults and children) by the subpopulations required by HUD.

Table 11. Sheltered Population by Subpopulations

Subpopulation	Number	Percent
American Indian or Alaska Native	11	2
Asian	0	0
Black/African American	205	30
Chronically Homeless Families (# of families)	4	1
Chronically Homeless Families (total persons)	12	2
Chronically Homeless Individuals	32	5
Chronically Homeless Veteran Individuals	17	3
Don't Know (Race)	6	1
Female	355	53
Hispanic/Latino	280	41
Households (total number)	363	54
Male	320	47
Multiple Races	59	9
Native Hawaiian or Other Pacific Islander	3	0
Non-Hispanic/Latino	379	56
Number of Persons in Households	675*	100
Persons Over Age 24	353	52
Persons with HIV/AIDS	4	1
Persons with Mental Health Problems	76	11
Persons with Substance Abuse Problems	53	8
Refused to Answer Race	43	6
Refused to Answer Ethnicity	2	0
Transgender	0	0
Unaccompanied Women	82	12
Veterans	33	5
Victims of Domestic Violence	78	12
White	353	52
Youth Ages 18 - 24	42	6
Youth Under Age 18-Households w/only children	3	0

*There were 363 households that made up the total number of sheltered persons, which was 675.

IV. Unsheltered Subpopulation Summaries

This section provides a breakdown of each of the following unsheltered subpopulations listed in the table above by other subpopulations:

- Veterans;
- Chronically homeless;
- Families;
- Unaccompanied Women; and
- Unaccompanied Youth Under Age 18;
- Youth ages 18 – 24.

Veterans

Total Unsheltered Number: <u>125</u>

Demographic Information	Number	Percent
Age:
